Mr. G.A. Gettinger  
President Midwest Oil Refining, Inc.  
753 Lamplight Lane  
Hazelwood, Missouri 63042

RE: MOD006290803

Dear Mr. Gettinger:

This letter is a follow-up to your conversation with Mrs. Harris of my staff in which she advised you that the inspection by the Missouri Department of Natural Resources, and its subsequent review by our compliance staff, indicated that the above facility is non-regulated under the Federal Resource Conservation and Recovery Act (RCRA) program, and could be removed from the Federal system.

In order to remove this facility from the system we need a written request from you asking us to take this action, or, if you elect to continue, we need an amended notification. Please provide us with one or the other, signed by the same individual who signed your original notification, or by his successor, if appropriate. As soon as we receive this information, we will make the necessary changes to our records and officially advise you in writing of your new status.

Because we are beginning the active permitting process, and your present notification indicates the need for a permit, it would be to your advantage if you were to take this action at your earliest convenience. This action deals only with the Federal RCRA program and does not dismiss you from the necessity to comply with the Missouri Solid and Hazardous Waste Laws and Regulations, 260.200 - 260.240 RSMo and 260.350 - 260.430 RSMo respectively. If you have any questions concerning this, please contact the Waste Management Program of the Missouri Department of Natural Resources at 314-751-3241.

If you have any further questions about the Federal system, or if you require additional assistance, please contact Mrs. Betti Harris of my staff, who can be reached at 816-374-6534.

Sincerely yours,

Robert L. Morby  
Chief, Waste Management Branch  
Air and Waste Management Division
